

The Sippy Cup

smilo

Sippy Cup guidelines:

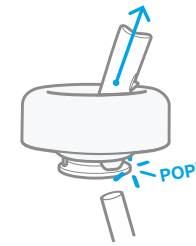

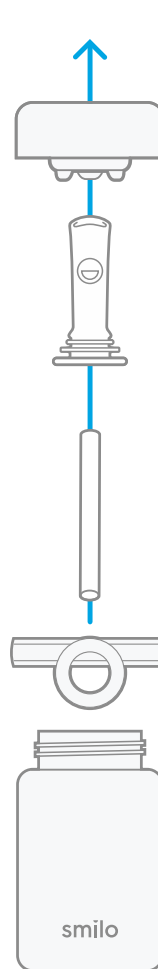

- Wash all cup components before every use. The parts are all dishwasher safe. Use the top rack only.
- When cleaning, remove the internal hard straw from the soft spout.
- Made of high-quality BPA-free materials.
- High or low pressure environments, like airplanes and mountains, can create pressure inside the cup. In these conditions unscrew the cap to relieve pressure prior to using.
- We do not recommend drinking carbonated beverages, like soda, from this cup. Carbonated beverages can build-up pressure within the leak-proof sealed cup and spray when opened.

Cautions:

- Do not use Smilo cups in the microwave or with microwave sterilization methods. Only sterilize with counter top sterilizers or by placing them in boiling water for a few minutes.
- Inspect the spout prior to every use. Replace the spout if it shows any sign of wear - including, but not limited to - tearing, cracking or a change of shape.
- This sippy cup is not a toy. Use only under adult supervision.
- The soft cup ring should not be used as a teether.

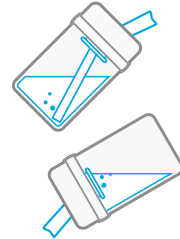

- 🔍 Nowhere for dirt and mold to hide
- 🔧 Simple parts, simple assembly
- 🧼 Easily cleaned, dishwasher safe
- 🔒 Leak-proof, fold-away spout
- 👤 Comfortable, on-demand flow
- 🌿 Medical-grade, BPA-free materials
- 🛡️ Patented technology, unique to Smilo

Pull the soft spout up through the cap until it pops into place....

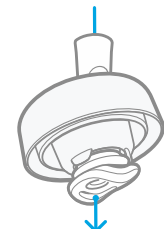

...and then insert the inner hard straw

Drink with or without the internal hard straw.

Fold the soft spout back when not in use.

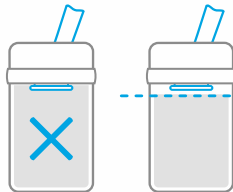

To disassemble, grasp the pull tabs at the base of the soft spout.

Pulling at a slight angle is the easiest way to remove the soft spout.

IMPORTANT TIP

Overfilling the cup can sometimes force liquid into the spout and lead to an unexpected squirt.

Fill the cup to just under the bottom of the spout - no more than 8.5 fl.oz. (250ml).

Indicaciones para el vaso antiderrame Smilo:

- Lave todas las partes del vaso antes de cada uso. Todas las partes son aptas para lavavajillas. Use solamente la rejilla superior.
- Para la limpieza, retire la paja dura interna de la boquilla blanda.
- Hecho con materiales de alta calidad sin BPA.

Precauciones:

- No caliente los vasos Smilo en microondas ni utilice métodos de esterilización con microondas. Esterilice únicamente con esterilizadores de mesa o colocándolos en agua hirviendo durante unos minutos.
- Inspeccione la boquilla antes de cada uso. Reemplace la boquilla si presenta algún signo de desgaste, incluido, entre otros, rotura, agrietamiento o un cambio de forma.
- Este vaso antiderrame no es un juguete. Utilice solo bajo la supervisión de un adulto.
- Este aro blando del vaso no se debe usar como mordedor.
- Conserve el embalaje del producto o visite nuestro sitio web para obtener instrucciones de montaje, limpieza y seguridad.
